I am very pleased with my satellite Radio. It provides a service that can not be obtained else where. I have the opportunity to listen to the kind of music I like when I want to listen to it. It might be oldies or country, it depends on my mood. I love the commercial free aspect and that's why I'm willing to pay to listen. I also like the fact that when I'm on the road I can still listen to my favorite satellite stations. I don't have to worry about fade out, static or no signal at all. If I wanted to I could listen to the same station coast to coast. Additionally I benefit from up to date traffic conditions and weather. For these reasons and others I respectfully urge the FCC to reject the NAB's petition 04-160 and request the FCC support XM Satellite Radio's ability to provide the kind of programming I demand and deserve.
